

DP3T Plus

Automated Programming System

www.dediprog.com

DP3T Plus responds to the industry's ever-evolving demands by handling down to 1x1mm packages. Able to support laser/labeling/inkjet marking, and a maximum of 16 programming sockets to boost productivity for extreme high-capacity devices. The highest UPH goes up to 1300.

With the NuProgPlus series programmer, the system supports dual sockets & highest read/write speed goes up to 180/mb. Auto Teach feature improves productivity by reducing the project setup time. This system is the epitome of versatility, making it an ideal solution for low-volume, high-mix production teams seeking efficiency without compromise.

Features

High Throughput

The system will be able to perform up to 1,300 UPH (Units per Hour).

High Expansibility

Able to embed with one set of NuProgPlus-S8-E or NuProgPlus-S16-E, up to 16 programming sites.

Support All IC Families

1. Supported IC: EEPROM, NAND/NOR FLASH, MCU, eMMC, and UFS, etc.
2. Supported IC Package: SOP, SSOP, TSSOP, PLCC, QFN, LQFP, and BGA, etc.
3. Minimum supported size: 1x1mm CSP.

Adjustable Socket Actuating Kit

Adjust socket actuating kits make it easier and quicker to switch to different types of socket adaptors according to the socket size. Therefore, you will not need extra socket actuating kits!

Software Supports Work Project

Able to create a programming file directly through DediWare according to your programming demands. It allows you to start programming right after loading the project, which will greatly reduce human errors.

Clamp Positioning Check

The system will automatically check if the clamps are installed properly before production to avoid machine/product damage caused by unmanned staff mistakes.

Support Different Input/Output Peripherals

Input/Output: Tube, Tape, and Tray.

Auto Teach Feature

1. Proceduralize- Automatically adjust handler's parameters step by step.
2. Digitalized- Automatically adjust the heights of nozzles.
3. Increase the speed of system adjustment.
4. Self-detection Function- Increase the accuracy & stabilities for nozzles' pick and place.

MES API

DediProg's handler can be easily integrated into different MES systems via the API protocol. It is capable of integrating remote control functions, fool-proof programming, and error management to enhance production yield and simplify management.

One Click Project Execution (OPRJ)

The OPRJ one-click activation feature enables fool-proof production (machine process and programming project), remote project editing, project preview, and machine qualification management. It can also integrate into MES systems through the API Protocol.

IC Marking Functions

Provides a variety of labeling methods

1. Ink Marker supports dot, character, or number.
2. Inkjet Printer supports string.
3. Laser Marker supports precise character marking.
4. Label Printer supports QR Code and barcode.
5. Label Feeder automatically supplies labels to IC for identification.

IC Inspection

Provide 2D inspection capabilities to detect pin failures in SOP, QFP, QFN, and BGA packages.
